

## CHG 2N / CHG 4N

Network-enabled chargers of the SpeechLine Digital Wireless series

### Firmware version 3.0.1 - release date 2025-06-04

For conformity, consistency and compatibility reasons, we strongly recommend upgrading the system to the new release.

#### Bug fixes

- In previous versions it could happen, that the MAC address of the charger changed after a certain time. This is related to a bug in the mDNS functionality for the case mDNS is switched off. With this version the bug is solved and mDNS can be switched off without changing the MAC address.

#### Firmware update

- The firmware update requires the Sennheiser Control Cockpit software:  
[www.sennheiser.com/control-cockpit-software](http://www.sennheiser.com/control-cockpit-software)

### Previous releases

#### Firmware version 3.0.0

- Support of remote pairing via Control Cockpit
- New SSC location command.  
A location name of up to 400 bytes can be stored via SSC command

#### Firmware version 2.0.3

- Support of the new CHG 2N network-enabled 2 bay charger
- New power saving mode

#### Firmware version 1.1.0

- Prepared additional parameters for future Sennheiser Control Cockpit releases (e. g. battery status information)
- Name changes are now announced via MDNS
- Minor bugfixes

#### Firmware version 1.0.0

- Initial firmware of the CHG 4N network-enabled charger of the SpeechLine Digital Wireless series
